Ultra-Drain Guard®

Protect the water system from sediment and pollutants with Ultra-Drain Guard catch basin inserts

The Ultra-Drain Guard is engineered to filter stormwater waste before it becomes a problem in the water system. As a storm drain filter, it removes contaminants like litter, sand, and oil from stormwater flow. Its geotextile fabric, Ultra-Filter-Tex, and easy installation make it ideal for industrial facilities, construction sites, and parking lots where stormwater runoff is likely to carry oil, eroded soil, debris, and fuel contaminants from cars.

- + Compliance: Exceeds 80% sediment removal efficiency. Helps comply with NPDES, 40 CFR 122.26 (1999) when used as Best Management Practice in Stormwater Pollution Prevention Plans.
- + Installation: Easily installed in most drains. To do it, simply raise the grate, place the Ultra-Drain Guard over the opening, and carefully lower the grate back in place. As a final step, pinch the fabric in place to keep it secure.

Project-specific models:

- + Oil & Sediment Model (Part# 9217/9356) — removes up to .87 gallons of hydrocarbons as well as dirt, sand, and other contaminants.
- + Oil & Sediment Plus Model (Part# 9219/9358) — the addition of Ultra-Filter-Tex filter strips increases oil and grease absorption by .51 gallons, offering a total capacity of 1.38 gallons of hydrocarbon removal.
